A RADIO PROGRAMME

of interest to paint users. Listen to Lowe Brothers famous composers program over station CKL.C, Red Deer, Thursday, February 27th at 9:00 p.m. Also over CKY, Winnipeg on Monday at 8:00 p.m. CJRM, Moose Jaw on Wednesday at 8:00 p.m. Lowe Brothers will broadcast a program each week on the above days throughout the summer.

Homes with charming exteriors and lovely interiors. How to achieve them—To those sincerely interested in beautifying their homes, who would paint their houses and decorate their rooms with appropriate colors, Lowe Brothers department of home decoration will mail you direct their house book illustrating the color scheme and proper color combination for your house, office, store or any building where proper color combinations are requested. Send me your name and address and I will have those books mailed to you direct from Lowe Brothers nearest distributing point, together with color cards and any other paint information that may be of interest to you. In buying Lowe Brothers paint and paint products you may apply them with the utmost confidence and with the assurance that you will thereby derive the enduring satisfaction that thousands of other house owners enjoy.

C. W. GRAY, AGENT, Carbon

Lowe Brothers high standard liquid house paint; Quick drying enamel (dries in 4 hours); Mellow gloss for walls, all colors; Truck and tractor paint; Floor enamels, Neptunite varnish and varnish stains; Red barn paint made from C.P.R. specification and similar to that used on stations, box cars, etc.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

BOARD OF TRADE ASKS FOR ROAD

A meeting of the Carbon Board of Trade was held in the Municipal office on Monday night. The first business to be discussed was the road signs, which were to be placed on the Cross roads near Carbon last year, and a motion carried to the effect that two signs be constructed and placed at the cross roads of the Belsker-Drumheller pole line and Carbon, showing the direction to Carbon. A committee of Messrs. Nash and Gittman was appointed to look after this matter. The following officers elected: President, J. A. MacDonald, Vice-president, J. J. Greenan, Sec.-Treas. S. F. Torrance, Council: Messrs. L. Poxon, and R. J. Fairbairn.

The membership fee of the Board of Trade was set at \$1.00 this year and the council of the Board was instructed to make their annual drive for members.

It was rumoured that the Provincial Government proposed to construct a provincial highway from the Medicine Hat highway north through the Municipal district of Grasswood, at a point in the vicinity of Baintree and to continue along township between the M. D. of Carbon and the M.D. of Norguay. A motion passed whereby the secretary was instructed to advise the Rockyford Board of Trade of this and get their co-operation with a view of appointing joint delegates to interview the members of parliament of the districts, Mr. Buckley and Mr. Claypool, also the Minister of Public Works, the Hon Mr. McPherson, with a view of having the road directed through the towns of Rockyford and Carbon and North thru Three Hills and Trochu.

It was also decided at this meeting that for the summer the Board of Trade will meet once a month, the last Monday in each month.

CLARA BOW IN "WILD PARTY"

Paramount's casting executives conducted a widespread search throughout Hollywood recently to find twelve girls to take the parts of members of Clara Bow's "gang" in the picture of romance and flaming youth thrills, "The Wild Party," which comes to the Carbon Theatre on Friday and Saturday of this week.

The edict had gone out that the "most beautiful girls in the picture industry must be chosen for the parts." The search was a prolonged one.

The girl who had the honor of being the first chosen for the supporting part was Adrienne Dore, who was Miss Los Angeles in the Atlantic City Bathing Beauty contest three years ago.

Miss Dore is a native daughter of Coeur D'Alene, Idaho, and is probably one of the "hottest potatoes" to ever come from that state, to use the words of Jack Oakie, screen slangster-actor, who also has a part in "The Wild Party."

She attended Forest Ridge convent in Seattle and then went to Los Angeles to become its reigning queen of pulchritude in 1925.

After her trip to Atlantic City Miss Dore joined Universal. Then she took part in a number of Educational comedies.

1932 GRAIN SHOW NOTES

1932 seems to be a long way off but when it is remembered that there is but the season on 1930 and that of 1931 during which to grow grain for exhibit, the time is short indeed. All grain for entry at the World's Grain Exhibition and Conference, under the regulations, must be on the exhibition grounds on or before March 1st, 1932. There is, however, no restrictions regarding the year in which the grain is grown. Grain grown in 1929 or previously is eligible for entry. All entries must be grown under field conditions.

Mike—Darling, in the moonlight your teeth are like pearls.

Hazel—Oh indeed. And when were you in the moonlight with Pearl

OLD TIME DANCE TO BE HELD ON FRIDAY, MARCH 7

An Old Time dance will be held in the Elks Hall, Carbon, on Friday, the 8th day of March. This will be a real old time dance, the kind that was held years ago, and all the old timers of the district attending will be assured of a jolly time. The dance, however, will not consist altogether of old time dances, so that the young folks of the vicinity will also be able to join in the fun. For every old time dance that is played, there will be one modern dance for the young people.

LITTLE ITEMS OF LOCAL INTEREST

The services at Christ Church on Sunday, March 2nd, will be conducted by Rev. H. E. Scallon of Drumheller, at 7.30 p.m.

Miss Edith Braisher of Calgary spent the week end visiting with her parents in Carbon.

The Carbon Bus made its first trip to Calgary for over a week on Tuesday of this week.

Mrs. H. Morrison and son of Oyen are visiting with Mr. and Mrs. J. E. James. They arrived on Thursday last.

The annual meeting of the Carbon School Fair Association will be held in the Farmers Exchange hall on Saturday afternoon, March 1, at 2.30.

The Band of the First Baptist Church of Fruedental will render a concert Sunday evening, March 2nd, at 7.30 p.m. This concert will consist of band pieces, dialogues, readings, quartettes both in German and English. Everybody is cordially invited. A free will offering will be taken, the proceeds of which will go towards the piano fund.

The W.A. of Christ Church will hold a tea and sale of home cooking in the Farmers Exchange hall on Saturday, March 1st. Everybody is welcome. 1c

ALBERTA'S MOUTH HEALTH CRUSADE

The important bearing that the condition of the teeth has upon the general health of the individual is to be brought to the attention of the people of this province in a forceful way in a sixty-day campaign beginning on February 17th. In every part of Alberta addresses will be given, stories told, films and lantern slides shown, and illustrated pamphlets distributed, all teaching the great lesson that sickness and suffering and even death may be caused by the neglect of the teeth.

In this work all the philanthropic and service organizations of the community are expected to co-operate. Churches and schools and clubs will play a particularly prominent part. The public will be shown how they may prevent the decay of the teeth by eating the right kind of food, balancing the diet, and brushing the teeth in a regular and systematic way. They will be informed about the ills that affect the whole body because of diseased teeth and about the best measures to be taken to deal with such conditions.

Nor will the Campaign be confined to educational work. The mouths of all the children in the schools will be inspected in which task every dentist will put in two days of his time without charge.

The Campaign is being put in by the Canadian Dental Hygiene Council, a nation-wide organization composed of public spirited persons of all classes, which will work through the Alberta Dental Association, with the active co-operation of the Provincial Departments of Health and Education. For the purpose of the campaign the province will be divided into twenty-two districts each with its own chairman and local campaign organization. Every citizen in Alberta is in one of these twenty-two districts and has an

FUNERAL OF MRS. THOMAS LAING

The funeral of Mrs. Thos. Laing, who passed away at the Mental Hospital at Ponoka on February 17, was held on Thursday last from the Anglican church and a large number of friends were present to pay their last respects to the deceased. Rev. Attwood of Calgary had charge of the funeral services. The pall bearers were: Messrs. Tom Ramsay, F. J. Hesant, C. H. Nash, Alex Shaw, R. Heath and John Atkinson.

Winter Bros. of Drumheller had charge of the funeral arrangements and interment was made in the Carbon cemetery.

DUTIES OF CURLERS

The following thoughts on curling as taken from the Weyburn Review, will strike a responsive chord in many a local bosom.

The writer outlines the duties of the various members of a rink.

The Lead—A Lowly Person—This is a very lowly person who throws the first pair of rocks. He is supposed to thank the Deity once a day in his prayers that he even exists, let alone being allowed to play at bonspiel time. He always addresses the skip as "Sir" and the third man as "Mr." This lead person is expected to see that the four pairs of rocks belonging to his rink are on the ice and cleaned five minutes before the game starts. He must do no less than 75 per cent. of the sweeping; he is expected to keep the skip fully supplied with cigarettes. His curling must be perfect or he is blamed for the loss of the games in which his rink suffers defeat. He may tell the second man what he thinks about the skip, but no one else. After many years he becomes a skip if he survives the sarcasm of his associates.

The Second Player—"Mere Man"—This person is but a degree removed from the lead. He is expected to do 15 per cent of the sweeping. He also, as the lead, is expected to keep the skip supplied with cigarettes and the third man with matches. He must on all occasions get the rock he is to pickout, otherwise he is blamed for loss of games.

The Third Player—A Gentleman—This gentleman is in a class by himself always. He could skip the rink, in fact he always could skip it far better than the skip doing the job now. He assumes an air of superiority over all leads and seconds and of mere condescension to his skip. He does the remaining 10 per cent of the sweeping. He holds the broom for the skip to shoot, and invariably tells the skip that he should have tried the shot he, the third man, had chosen and not the one he, the skip, has just missed.

The Skip—The Ideal Curler—He is a gentlemanly sportsman who gets up the rink, often sacrificing valuable time to the interest and entertainment of three other curlers who wish to play in the bonspiel. He does none of the sweeping, he merely holds the broom and his own temper while the rest of the rink miss the one and strain the other. He has to knock out shots when he can only see an eye brow. He must draw to the button, making it by eighths of inches. He must play a runner shot and a draw the next. He must take out four rocks with one shot and then lay on the button and generally make himself useful, knowing that if he wins his rink gets the credit and if he loses he alone bears the blame. He must have the patience of Job and the aggressiveness of Napoleon, must never complain or he will be classed as a poor sport.—Exchange.

Love at first sight is possible but it is always best to wipe off your spectacles and take a good look.

opportunity to help.

The growing generation should be healthier than the one that preceded it because of this dental crusade; and a lot of misery on the part of adults due to lack of knowledge and care of the teeth should be obviated.

"SALADA" TEA

'Fresh from the gardens'

The True Spirit

At the first showing at Ottawa of the moving picture record of the great Boy Scout Jamboree, held in England last summer, in which 50,000 boys from all parts of the world participated, His Excellency, the Governor-General, Lord Willingdon, in an introductory speech, spoke to the Boy Scouts and Girl Guides present "very particularly and in all seriousness," saying:

"You, young as you are, must know, we all know, that since the years of the Great War, all the nations of the world have been striving by conferences, by pacts and agreements, and by personal negotiations to get rid of the terror of future warfare. The League of Nations has during the past ten years done a great and noble service to secure this end. But I am inclined to feel myself that this younger League of Nations is the most hopeful organization to achieve what we are striving for."

"Under this association you are all growing up filled with the spirit of goodwill and good fellowship to all others, to do your good turn each day to one another, in whatever country your future work may find you, whatever the race and colour of that other may be. I beg of you all to let that spirit guide you in your future lives, for it is by that spirit which teaches us to think well and not ill of our neighbour, that we shall in time attain our great goal, peace among the nations of the world."

These words of His Excellency are most timely because, if there is any one thing calculated to nullify the efforts of statesmen in all countries, destroy the unifying work of many organizations, and bring to naught the prayers of millions of people, it is the persistent and poisonous propaganda of a few evil-minded persons who see gain for themselves, or temporary advantage for some cause they espouse, through the division of peoples and nations along racial or religious lines, and the cultivation of feelings of suspicion, ill-will, and antagonism among and between them.

It is probably too much to hope that those individuals who are serving their own selfish ends by such unpatriotic conduct at home, and destructive of peace and brotherhood abroad, will cease from their evil ways. They are fully alive to the harm they are doing, but that counts for nothing with them because they are reaping some small and temporary selfish benefit themselves. But there are bright hopes for the future if the boys and girls today learn the better way, and in the activities of everyday life emulate the life and example of the Great Teacher who went about doing good to all men, who taught men that love is better than hate, who refused to recognize any distinction between men of different races or creeds, but emphasized at all times the common brotherhood of man and Fatherhood of God.

Just as the serpent brought evil and discord into the first Garden of Eden, so do the serpents of today in many disguises seek to keep alive all the ill-will, suspicions, prejudices and passions engendered in the bygone years of a less civilized era in the world's history. These fermentors of strife at home are the first line of defence maintained by those who desire for gain to keep the nations armed to the teeth, and who foment and precipitate wars.

The League of Nations is striving with every means at its control to allay racial suspicions and ill-will. While engaged with practical problems of disarmament, and other concrete causes of strife, the League is devoting possibly even more attention to educational influences. The efforts made to raise the status of women and children in backward countries, to improve labor countries everywhere, to put an end to white slavery and the traffic in narcotics, all have as their underlying object the removal of causes of friction, misunderstandings, and ill-will among people, and the development of a spirit of world brotherhood. The Balkans have long been recognized as the danger spot of Europe, and the reason is found in racial and religious suspicions and prejudices. Once these can be allayed, peace in Europe will be largely assured.

Lord Willingdon sees in the Boy Scouts and Girl Guides one of the most hopeful movements for future world peace, while Sir Phillip Gibbs has declared that the Junior Red Cross in banding the youth of all nations under the common banner of service for humanity, offers the most hopeful sign of the dawning of a better day. The Y.M.C.A. is engaged in the same work among young men of all races, colours and creeds.

Evil-minded men may stir up strife for a time here and there; they may appear to reap a measure of success; but it is temporary, and when the passion of the moment subsides, and people realize how they have been fooled for an ulterior purpose, it will be found their actual achievements have been nil. Hate may influence people for a time, but love in the long run will conquer. It always has; it always will, for love alone is enduring.

Manitoba Poultry Pool

Thirteen million dozen eggs were marketed in 1929 by the central selling agency of the Manitoba poultry pool, according to a statement at a meeting in Winnipeg. Membership in the pool is 14,000.

Colonel, inspecting barracks: "Supposing the barracks were to catch fire what would you do?"

Bugler: "Sound me bugle, sir!"

Colonel: "And what call would you give?"

Bugler: "Cease fire, sir."

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Interpreters At Geneva

Speeches Have To Be Translated Into English and French

Dr. Caroline MacDonald, of London, Ontario, who has spent many years in Tokio, in social service and prison reform work, last year accompanied the Japanese labor representative to the International Labor Conference in Geneva, as interpreter. This was no easy task, the Eastern and Western languages differing so radically. During the ten days' preparation in Geneva for the great conference, which lasted three weeks, Dr. MacDonald had to translate all speeches from the Japanese to the English, as English and French were official languages to be used, and following the address of the Japanese representative, she mounted the tribune and gave it in English to the non-Japanese speaking section of the audience.

The interpreters at Geneva are the eighth wonder of the world, says Dr. MacDonald. By an ingenious arrangement of telephones in the hall of meeting, interpretation of the speeches into two or more languages follows one sentence after the actual delivery. Telephones were at each desk, and each member dialed on whatever language they wished to hear.

ARE YOU RUN DOWN AND NERVOUS?

All That Is Needed Is a Tonic To Build Up the Blood

There are thousands of people who really find life a burden. They have endured nervousness, sleeplessness and a general run-down feeling so long that they have given up hope of again enjoying good health. Rest and a blood-building tonic are all that is required to restore health and vitality. Such a tonic is found in Dr. Williams' Pink Pills. They are recognized the world over as a wonderful blood-builder and nerve restorer.

Mrs. F. C. Granier, Toronto, Ont., bears testimony to the worth of these pills. She says: "Five years ago, after a life of perfect health, I became ill. Not seriously at first, just no appetite, no pep and no sleep. I gradually grew worse. I became pale and listless; my arms and feet were badly swollen and although I doctored all winter my condition did not improve. In the spring I went to see a specialist and he sent me to the hospital where I remained for seven weeks. I left the hospital in worse condition than when I entered it and went home a nervous wreck. I remained ill at home all summer and entered the hospital again in the fall where I was under observation for three weeks and although everything possible was done for me I did not improve. Shortly after this a friend advised me to take Dr. Williams' Pink Pills as a blood builder so I sent for a supply. I do not know when I first noticed an improvement in my condition. It seemed to come to me gradually. I began to sleep better; my meals so long distasteful were being eagerly awaited and enjoyed. I began to show an interest in what was going on around me. The color came back to my face and strength to my limbs. I persisted in the use of the pills and soon I was well and happy again. That is five years ago and ever since I have been able to do all my housework and have not had the least return of my former trouble."

If you are feeling run down give Dr. Williams' Pink Pills a fair trial and new health will be yours. You can get them from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Odd Use For Eggs

You might not know it, but the same eggs you use for cooking are used for tanning gloves, and this industry is the cause of importing more than 800,000 eggs a year into England. Only the yolk of the egg is used in the tanning process.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions, will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

A Dog's Paradise

Not a single flea exists in the South African town of Prieska. Scientists working on a plague prevention survey of Africa, conducted wide researches for the elusive insect but at Prieska none were found. It is on the Karroo prairie. Prieska is now boasting itself as the "plague-proof" town, and dogs of all nations look upon it as a paradise.

Use Minard's in the Stable.

W. N. U. 1826

An Ailing CHILD

Are you prepared to render first aid and quick comfort the moment your youngster has an upset of any sort? Could you do the right thing—immediately—though the emergency came without warning—perhaps tonight? Castoria is a mother's standby at such times. There is nothing like it in emergencies, and nothing better for everyday use. For a sudden attack of colic, or the gentle relief of constipation; to allay a feverish condition, or to soothe a fretful baby that can't sleep. This pure vegetable preparation is always ready to ease an ailing youngster. It is just as

harmless as the recipe on the wrapper reads. If you see Chas. H. Fletcher's signature, it is genuine Castoria. It is harmless to the smallest infant; doctors will tell you so.

You can tell from the recipe on the wrapper how mild it is, and how good for little systems. But continue with Castoria until a child is grown.

Life Saved By Hymn

British Soldier Suspected Of Being a Spy, Had Narrow Escape

How a British soldier escaped death as a suspected spy at the hands of the French by singing a hymn, was related to the Chapel-en-le-Frith (Derbyshire) Board of Guardians.

The man Joseph G. Davidson, who had sought relief during a recent indisposition, served with the Expeditionary Force in France during the war. He was taken prisoner, and after spending 2½ years at various camps in Germany escaped into the French lines. Here inquiries were made about Davidson, and information was received from the British G. H. Q. that the man had been killed in action.

The French promptly ordered him to be shot as a spy, but a few hours before the firing party were ordered out, a wounded British soldier asked Davidson if he could sing. He sang "Abide With Me," and this so impressed his captors, that they made further inquiries, and eventually released Davidson.

Minard's—50 Year Record Of Success.

The Greatest Mystery

According to a western newspaper, the sweet mystery of life is love, but according to a widely held idea the great mystery of life is how so many people manage to live up to a Rolls-Royce standard on a flivver income.—Boston Transcript.

An Unusual Picture

Sunset On Moon Taken With Motion Picture Camera

Motion pictures showing sunset on the moon was one of the features of the annual exhibit of the Carnegie Institution, of Washington. The film was made at the Mt. Wilson Observatory, in California, with a motion picture camera attached to the great 100-inch reflecting telescope. Like the earth, the moon rotates, thus causing the sun to rise, cross the sky and set, but as the moon takes twenty-seven and one-third days, instead of twenty-four hours to rotate, lunar sunrise and sunset are more leisurely than the earthly variety. Because there is no atmosphere on the moon, there is no twilight, and the sunset represents a sharp change from brilliant sunlight to darkness, instead of the gradual diminution of light on the earth. The film shows the shadows of the lunar mountains crawling across the surface. The actual times occupied in the taking of the film was five and one-half hours, but it is speeded up in projection, and runs through in a minute and a half.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Steward (to sea-sick passenger): "Feel like a cup of tea, sir?"

Passenger: "Do I look like a cup of tea you idiot?"

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

THE ONLY WAY OUT

We don't blame members of the un-
employed ranks who fail to wax en-
thusiastic over the 25c an hour relief
work, yet we feel that the Province
of Alberta and the various municipali-
ties which have co-operated to make
the emergency scheme possible, are
deserving of congratulations.

Possibly if David Lloyd George had
introduced a system of relief work in-
stead of unemployment insurance,
Great Britain would be in a sounder
economic position today. The average
man who is compelled to seek aid, re-
tains his self-respect when given work
to do even though he may complain
at the relatively low wages; and when
the work is productive it helps to
bring the nation back to more normal
conditions.

In this instance, where machines
could have been brought in by the
government, it is an economy to pay

higher costs for hand labor. Through-
out the negotiations there has been
no attempt made to exploit the work-
less and it is to be hoped that this
practical effort to solve the problem
of unemployment and distress will
prove to be satisfactory to everyone
concerned—Drumheller Mail.

ON THE VICE OF MONEY-MAKING

The editor of a newspaper wheeled
his chair around and pressed a button
on his desk. The office boy appeared.
"Here," said the editor, "are a num-
ber of directions from our readers tel-
ling us how to run our paper. See
that every one is carried out."

And the office boy, gathering them
all in a large waste paper basket, did
so.

Curiously this little parable reached
us by the same mail as a letter from
A Reader—Constant or Inconstant, we
do not know—complaining of com-
mercialism in the newspapers. Not our
daily especially, you will understand,
but all papers. He believes, as far as
we can gather, that it is one of the
faults of our social system that news-
papers should make money or even
want to or expect to make money.

Be it far from The Albertan to as-
sume a take-it-or-leave-it attitude.
On the contrary we believe the read-
ers of our paper, or any paper, have
just as much right to state their likes
and dislikes as they have to tell the
butcher that last Sunday's joint was
tough or to ask the grocer to stock
a preferred brand of baking powder.
We will not even deny that this and
other newspapers aspire to make mon-
ey—nay, worse, to make profit—just,
no doubt, as our correspondent aspires
in his own business.

We will admit, however, that the
newspaper is of the nature of a public
institution, even if it is financed by
private capital. Hence, perhaps, the
idea that it has not a private corpora-
tion's right to hope for gain. For even
the most conservative member of so-
ciety is to some extent a Socialist by
intuition. It may not accept every
current theory about public versus pri-

vate ownership, but when a utility is
publicly owned he expects to get ac-
cess to it if, not for nothing, for some-
thing very near nothing.

There is, of course, a vast difference
between profit-making and profiteer-
ing. Few of us are guilty of the latter—
or, for that matter, of the former—
in these days of competition. But if
profit-making is commercialism let us
admit that our whole fraternity as-
pires to it just as every other business
in the world. It appears to be one of
the characteristics of our age that
everything ending with -ism is under
suspicion. A nation that is prepared to
defend its people's homes is accused of
militarism and in other spheres we
hear of Americanism, Socialism, cler-
icalism, and now comes commercialism.
And it appears they would all be per-
fectly excellent, or at least permis-
sible, qualities but for the suffix.—

Stop us if you've heard
this one . . .

"My Dear, I simply dread this daily shopping!" How many
times have you heard that story? More than once, we'll bet a hat.
And if you ask the woman who "dreads shopping" just why she
does so, you'll usually hear something like this:

"It takes so much time! I start out and look and look and
look . . . and by the time I've found what I want I'm dead on
my feet. All in, my dear. I mean I actually am!"

You can do a friend like that a real service. Ask her if she
reads the advertisements. Usually she'll look surprised and say,
"Not very often. What has that to do with it?"

Tell her how you have your mind made up before you hang
the market basket over your arm . . . how you're able to save
steps, budget your expenditures neatly, get what you want—and all
with a minimum of time and effort. Simply because you have the
news of the shopping world at your finger-tips all the time, by
reading the advertisements every day.

ADVERTISEMENTS ARE NEWS. VITAL, PRACTICAL NEWS.

Field- Work Power

Spring work comes with a rush—
you need power, sure, certain power,
hour after hour, day after day, you
need it steadily, incessantly from
the first furrow to the last seed.
The more work to do the quicker
you must do it. The more acres to
plow, the more land to work—the
more your profits of this year's
operations depends on POWER.

Put a CATERPILLAR in your
fields. On the side hills, through
loose summer fallow or heavy soft
spots it will work harder, steadier,
surer, with less trouble and at less
expense than any other form of
power you can use.

Third Great West Canadian FOLK DANCE FOLK SONG HANDICRAFTS Festival

at **CALGARY**
MARCH 19 to 22

Four days of lovely music and color,
illustrating the Arts, Crafts and Song of
the peoples of the prairie provinces—
British, French-Canadian and European,
with an American flavor of Cowboy
songs.

Singers, Instrumentalists, Folkdancers
from racial groups in the picturesque
costumes of their country of origin.

Visiting Artists, including Isabelle
Burnada, Selma Johansen de Coster
(The Swedish Nightingale) and Charles
Marchand, French-Canadian Folksinger.
Handicrafts organized by the Canadian
Handicrafts Guild (Alberta Branch),
Music and Folkdancing organized by the
Canadian Pacific Railway.

N.B.—Those wishing to exhibit handi-
crafts should communicate with Mrs. J.
J. Anderson, Secretary Alberta Branch,
Canadian Handicrafts Guild, 1c March-
and Apts., Edmonton, or Palliser Hotel,
Calgary, Alta.

KIDNEY TROUBLE
BACKACHE VANISHED
"Like magic," says Mr. A. Chagny. Thousands write kidney and bladder ills, constipation, indigestion, gas, backache end overnight with "Fruit-a-tives." Nerves quiet. Sound sleep at once. Get "Fruit-a-tives" from druggist today.

WORLD HAPPENINGS BRIEFLY TOLD

Moscow authorities have decreed that all restaurants in the city should have nine meatless days each month. It being hoped thus to save both meat and fuel.

The giant British dirigible, R-100, is undergoing tests with the possibility that she may make a flight to Canada towards the end of April or the beginning of May.

Aeroplane service carrying passengers between St. Paul, Minn., and Winnipeg was inaugurated February 17. The passenger service will be operated over the week-ends only.

Canadian silver fox pelts are finding a ready market in Great Britain. It is stated by Lt.-Col. D. A. MacKinnon, D.S.O., of Charlottetown, P.E.I., one of Canada's principal silver fox breeders.

Orphaned by an air crash in Texas, recently, in which his father and mother were both killed, 16-month-old Robert Gray, Jr., must return 10,000 miles to New Zealand because of United States immigration laws.

With the intention of securing the same control over real estate dealers and their transactions as they now enjoy in respect of stockbrokers, the Ontario Government, at the present session, will introduce new legislation to prevent frauds against the public.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Means Plenty Of Work

Recording Australia's Rainfall Is Considered Quite A Task

Australia has an area of 3,000,000 square miles, and the task of recording the rainfall is one of considerable magnitude. Throughout the continent there are no less than 6,000 rain gauges, 900 of which are operated by private citizens, who are all unpaid weather observers. In some parts of Australia the observers have a busy time in the rainy season. In eastern Queensland early this year as much as 10 inches of rain were recorded in 24 hours.

Subsidies For Air Transport Urged Would Put Passenger Rates On Par With Railway

Subsidies for aerial passenger transport line were urged by Major General J. H. MacBrien, president of the Aviation League of Canada, in a speech at Montreal. In Europe, where such subsidies are paid, aerial passenger rates were on a par with railway rates whereas in Canada the air rates are three times as great as those offered by railroads.

For this reason the passenger branch of air transport was not progressing.

General MacBrien urged the formation of a branch of aviation to be known as aerial service in which all companies would co-operate to eliminate wasteful competition and work for greater development of the industry.

Busy Construction Season

Saskatchewan Awarded Largest Number Of Contracts During Year 1929

The Saskatoon Western Producer notes that, "with a total of 2,327, Saskatchewan took the lead among the four western provinces for the number of construction contracts awarded during the year 1929, according to figures reported to the Saskatchewan Department of Railways, Labor and Industries. This compares with British Columbia's 2,275, Alberta's 2,055, and Manitoba's 1,658. The value of the permits in the province was \$34,184,300, or an increase of \$14,000,000 over the 1928 total."

PALPITATION Throbbing of Heart After the "Flu"

Mrs. J. Cunningham, Sault Ste. Marie, Ont., writes:—"Last February I had a severe attack of influenza which left me with palpitation and throbbing of the heart."

"I felt very weak and tired so began to take

and used about six boxes and have found them help me a great deal, and am very thankful for having found such a good medicine."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Largest Elevator At Any Seaport

Mammoth Alberta Wheat Pool Elevator In Operation At Vancouver

The largest terminal grain elevator at any port on the seven seas has recently been put into operation at Vancouver by the Alberta Wheat Pool. This elevator has a capacity of 5,150,000 bushels and is known as Vancouver Pool Terminal No. 1.

The port of Vancouver is now an important grain shipping centre. During the crop year ended July 31, 1929, shipments of grain totalled 96,138,218 bushels compared with 79,714,512 bushels for the year ended July 31, 1928, and 34,415,653 bushels for the 1926-27 crop year.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Claim Tree Is Tomb

An oak tree, 1,000 years old, near the village of Noebdenitz, is claimed to be the tomb of the famed German poet and statesman, Hans von Thummel. The tree had a large hollow in its trunk and in this hollow, back in 1924, Thummel is supposed to have been interred. The cavity has been filled up with concrete.

There are, at present, only two places in Europe where the accordion is not despised—Scotland and Belgium, the latter country possessing 40,000 accordion players.

Minard's Kills Dandruff.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

Will Try New Process

Canada To Experiment With Freezing Fish In Transit

Experiments in the freezing of fish in transit by the silica gel process will be conducted by the Department of Fisheries early this summer. It was learned at Ottawa. It has been found in the United States that this method of refrigeration is eminently satisfactory in the transportation of pre-chilled fish, but the Canadian Department desire to go a step further and ascertain if it is equally as effective for fish that has not been pre-chilled.

Should the experiments prove successful it would mean a saving of about 12½ per cent. in refrigeration space, with a consequent increase by that proportion in the packing of fish cargoes by rail.

Some Figures About Canada

Few Grasp Vastness Of Britain's Largest Overseas Dominion

Canada is Britain's largest overseas Dominion; bounded by three oceans. Coastal distances (per Canada Year Book): Pacific Coast line, 7,180 miles; Hudson Bay coast line mainland, 6,000 miles; Atlantic coast line, 5,000 miles—Total 18,180 miles. Canada's greatest width in due east and west direction approximately 3,050 miles; greatest distance between southerly and known northerly land extremities, approximately 2,870 miles. Canada-United States boundary, 3,985 miles long; 1,787 miles by land, 2,197 through water. Canada is larger in area than United States with Alaska by 42,912,000 acres.

Manitoba Honey

Manitoba produced 6,899,399 lbs. of honey last year, 15 individual operators each produced a carload or more. Manitoba exhibitors secured three first places out of four classes entered at the Royal Agricultural Fair, at Toronto.

SUNDAY SCHOOL LESSON MARCH 2

JESUS TEACHING ABOUT HIMSELF

Golden Text: "Come unto Me, all ye that labor and are heavy laden, and I will give you rest."—Matthew 11:28.

Lesson: Matthew 11:2 to 12:50. Devotional Reading: Isaiah 61:1-10.

Explanations and Comments

What Jesus Said About Himself To John the Baptist, 11:2-6.—John the Baptist had been imprisoned at Mac-haerus by Herod, and when his disciples came and told him what Jesus was doing, he sent them to Jesus to ask, "Art Thou He that cometh or look we for another?" "He that cometh" is a phrase for the Messiah, derived, it is believed, from Psalm 118:26. As Dr. Bruce comments, by this time John had been a prisoner for some time, long enough to develop a "prison mood." When John was free he had been the first to recognize that Jesus was the Coming One, the Messiah, but in his imprisonment he had grown doubtful, for to that caged eagle Jesus seemed too mild in his dealings with men to be the expected avenger, the Christ as had pictured Him.

"There is only one Man with whom it is always high-water; all others have ebbs and flows in their religious life, and variations in their grasp of truth."—Alexander MacLaren.

John's disciples found Jesus busy with the very work that had disappointed John. The sick were coming to Him, and He encouraged their coming; to the poor He proclaimed the gospel, but uttered no word about the fire or the ax of which John had spoken (Matthew 3:10-12). Jesus stopped His work to answer John's messengers. "Go and tell John," He said, "the things which ye hear and see; the blind receive their sight, and the dead are raised up, and the poor have good tidings preached to them—all a fulfillment of the prophecy as to the Messiah, in Isaiah 35:5, 6; 61:1. "Tell your story over again and remind him of those prophetic texts. Let him study the two together and draw his own conclusion." It was a virtual invitation to John to revise his Messianic idea, in the hope he would discern that after all "love" was the chief Messianic charism.—A. B. Bruce.

The miracles were Jesus' credentials. They proved His divine power, and they revealed His divine sympathy. They were "signs," as they are called in the Fourth Gospel, recorded "in order that ye may believe that Jesus is the Christ, the Son of God, and that believing ye may have life in His name."

"To me these acts of healing and restoration, whether of the soul or of the body, are not incredible. I do not regard them miracles in the sense of violation of the laws of Nature, but as manifestations of spiritual power, and as wrought through knowledge of spiritual laws in the obscure domain where soul impinges on body. Almost as important as their truth is the disposition of Jesus revealed in them."—Dean Worcester.

There was no word of rebuke for John's lack of faith, but this gentle

WHEAT POOL TO BE ESTABLISHED IN AUSTRALIA

Canberra, Aus.—A great wheat pool will be established in Australia. There is some difference as to whether it will be a Government-controlled body, or under the direction of the wheat growers themselves. But there is little doubt that a Commonwealth wheat marketing body will be in operation in a comparatively short time.

A great conference between the Commonwealth and State governments, and the Wheat Growers' Association, decided on the Pool. The Federal Government wants it to be under government control, with a state board in each state operating under a commonwealth board at Canberra, on which the state boards would be represented. The wheat growers want it to be under control of the farmers.

The real difference, however, centres around the government guarantee of a stabilized price for the farmer. The government offered to guarantee 96 cents a bushel for wheat delivered at country sidings, the equivalent of \$1.08 a bushel f.o.b., for one year only. The wheat growers asked that this guarantee be extended to cover three years. Hon. Parker MacLoney, Federal Minister of Markets, said the government could not agree to extending this guarantee until it was seen the scheme for an Australia-wide wheat pool was in operation.

But when the pool is established and is working satisfactorily, the government will favorably consider the suggestion of extending the guarantee of price, the minister promised.

Record Entry For Manitoba Winter Fair

Officials Are Looking For Additional Stabling Accommodations

Brandon, Man. — Another record making entry has caused the officials of the Manitoba Winter Fair to look around for additional stabling accommodations. A year ago every available inch of space was used in the Arena buildings to take care of the livestock entries, and some departments were cramped even after some of the stock had been taken care of in outside barns.

It is expected that the Hon. T. A. Crerar will open the show. If the new Minister of Railways, and member for Brandon, can leave Ottawa even for a short time in March, he will probably attend the opening of the exhibition.

Would Give Power To States

Association Is Against Prohibition Amendment, Demands Its Repeal

Washington, D.C.—Outright repeal of the Eighteenth Amendment and a transfer to the states of the power to regulate intoxicating liquors was demanded by witnesses before the house judiciary committee which after a recess of several days has returned to the hearing of testimony for a change in the dry laws.

William H. Stayton, chairman of the board of directors of the Association Against the Prohibition Amendment, asserted people throughout the United States had lost respect for the government because of the prohibition law, and because it had lost its efficiency.

Worried By Dogs

The Pas.—Mongrel huskies, roaming the streets of The Pas during the winter season, are alarming citizens of the northern town. Their latest attack involved the mauling of William Hinchuk, 10, in front of St. Anthony's hospital. A passing priest saved the lad from serious injury. Three other cases of canine onslaught have been reported by hospital authorities.

Returning To England

Ottawa, Ont.—Capt. R. T. W. Fienness aid-de-camp to His Excellency, the Governor-General, has left Ottawa for England, to take up the appointment of adjutant to his regiment, the Royal Scots Greys. Capt. R. N. Brinckman, Grenadier Guards, has been appointed to take Captain Fienness's place on His Excellency's staff, and will arrive in Ottawa next month.

W. N. U. 1826

Drive Against Orientals

White Canada Association Asks B.C. Government For Campaign Fund

Victoria, B.C.—The British Columbia Government was asked to ascertain the practicability of the removal from the country of all Asiatics and expropriation of all property owned by them upon payment of compensation.

In arguments presented before the agricultural committee of the legislature, it was stated that the elimination of the Oriental from British Columbia was the most pressing matter before the people today, and that the situation was grounds for a grant of \$5,000 to the White Canada Association for a campaign fund to carry on an agitation for revision of British treaties which now bar restrictive local legislation.

The matter was brought before the committee of the advisory board of the Farmers' Institutes, and was spoken to at length by A. B. Smith, of Cranbrook, secretary of the advisory board; C. E. Hope, of the White Canada Association, and J. P. Hampton Bole, grand factor of the Native Sons of British Columbia.

It was declared that the whites could compete with the Chinese but that the Japanese were another matter. Severage of competition caused the whites to drop out of an industry, it was declared by Mr. Smith. He said, however, that there was no lessening of output, but an actual increase as Orientals took up slack production.

"To them, it is a profitable business," he said. "They have less overhead, work longer hours, and are willing to work the whole family."

Mr. Hope asked the province to persist in re-enacting disallowed legislation until some action was attained. He advised placing pressure on Ottawa towards attaining a redrafting of treaty arrangements. Such redrafts would be acceptable to Japan, he believed, if they were on a basis of exact mutuality.

Will Request Change In Banking System

Western Members Of Federal House Have New Plan

Ottawa, Ont.—Western members of parliament, gathered in the capital for the opening of the session, are keen to get on with public business and in many cases will endeavour to get parliamentary approval of important reforms.

Perhaps the most coherent objective among western members is to bring about a change in the banking system, whereby a federal bank of discount would be set up and the present discount activities of the treasury board much curtailed, if not discontinued altogether.

The Alberta members are particularly desirous of getting action along these lines. It is held that the general credit situation and the gold position in recent months has proved the inefficiency of the present banking system and the need of a change.

Will Use King's Cutter

Famous Racer Britannia To Test Speed Of Lipton's Challenger

Portsmouth, Eng.—King George's famous racing cutter "Britannia," will be specially commissioned to sail against Sir Thomas Lipton's new challenger for the America's Cup — The Shamrock V.—in the Solent. The date for the trials has not been set but probably will be arranged so His Majesty may attend. The Britannia is one of the fastest boats in the English waters.

Registered Mail Stolen

London, England.—A hundred registered letters, mostly containing money orders and bills in dollar currency, were stolen from a postal bag which left Montreal on February 9, aboard the "Doric," and was sent by train from Queenstown to Belfast via Dublin. The theft was discovered at Belfast. The seals of the letters were found to be broken, but the bag had been re-tied.

Bars Women From Law

Quebec, Que.—The bill designed to amend the statutes so that women might be admitted to the practice of law in the province of Quebec, was defeated in the legislative assembly by a vote of 37 to 29.

WINS GOLD MEDAL

John Johnson, chief superintendent engineer of Canadian Pacific Steamships whose paper "The Propulsion of ships by modern steam machinery" has been awarded the gold medal for 1929 by the Council of the Institution of Naval Architects.

Discuss Peace River Outlet

Private Company Asks Alberta Government For Permission To Build Line

Edmonton.—If the Canadian National or Canadian Pacific Railway companies jointly or individually, will undertake to build a new northern line giving the much desired Peace River outlet to the coast, information to that effect will be appreciated by the legislature; otherwise there is a fairly good chance of a charter being granted to the Beaver Lodge Narawa River Railway Company, which is asking permission to construct a line through the Gray Pass, it was revealed here. The bill to incorporate the company was before the railways committee of the house, and given a thorough discussion, the outcome being that C.N.R. and C.P.R. officials are to be asked to attend at a future sitting of the committee and state what objections, if any, and what intentions, if any, or both of the transcontinental roads may have, in the matter.

Royal Wedding Postponed

Rumanian Princess May Break Engagement To German Count

Bucharest.—Postponement of the wedding of Princess Ileana, of Rumania, and Count Alexander von Hochberg, is the only official answer in Rumania to reports that their engagement, which the princess herself announced some weeks ago, had been broken off definitely.

Premier Manium said the government was investigating the antecedents of Count von Hochberg, in Germany, and was seeking further information about him. If the Rumanian Government found anything reflecting dishonor upon the count, it would intervene and advise against the maintenance of the engagement.

JEWEL VALIQUETT AND ROBERT CLIFFE WITH THEIR PET HUSKY

Here is shown Jewel Valiquett and Robert Cliffe, with their pet husky dog, as they appeared at the first international winter carnival at Ottawa.

Applying For Charter

High Speed Road Bill Is Again Before Alberta House

Edmonton, Alberta.—Supported by an influential petition containing the names of over 5,000 residents of southern and central Alberta, the bill for a charter incorporating Alberta Trackways, Limited, comes before the Alberta legislature this session for the third time, sponsored this year by Donald Cameron, U.F.A., Innisfail.

The bill provides for the incorporation of a company which undertakes to lay concrete highways of not less than 18 feet in width, from Edmonton to Calgary, from Calgary to Banff, and from Calgary to Macleod, Lethbridge and Coutts.

Construction of the trackways is to be commenced within two years, and completed within five years of the securing of the charter.

The idea back of the plan is for a system of safe, speedy, all-weather highways, constructed of concrete between the points indicated, which would enable auto drivers wishing to make the best possible time between these points, to travel on the trackways instead of on the slower and more tortuous provincial highways.

A small toll would be charged each car for the privilege of driving over such trackway and, according to the promoters, such toll would more than be offset the saving in gasoline, wear and tear on car and tires, saving of time, etc.

The promoters are D. F. Whitney and W. D. Milner, of Calgary, and J. W. McDonald, of Macleod, and ample financial backing is available in case the legislature this year sees fit to grant the application, the promoters state.

Wins New Honors

Coast Astronomer Awarded Medal For Distinguished Work

Victoria.—Dr. J. Plaskett, director of the Dominion astro-physical observatory, has received word that he has been awarded the Rumford medal, given by the American academy of arts and science for distinguished work in astronomy.

The last recipient of this honor was Professor Arthur Compton, of Princeton, winner this year of the Nobel prize.

The Rumford medal will be presented to Dr. Plaskett at Boston, on April 9, when he is en route to England to address the Royal Astronomical Society and receive his gold medal, recently awarded him for his remarkable studies in stellar movements and the scientific conclusions which have been made possible by his labors.

Granted Incorporation

Winnipeg.—The Scandinavian Colonization Association, an organization which will aid and assist in bringing immigrants to Canada from Norway, Denmark, and Sweden, has been formed, under the presidency of H. P. A. Hermanson, Winnipeg. Headquarters of the association, recently granted incorporation by the Dominion Government, will be in Winnipeg.

CONFERENCE TO MEET IN LONDON SEPTEMBER 30

London, England.—Prime Minister MacDonald told the House of Commons that the next meeting of the Imperial Conference will be held in London this autumn. The date for the opening meeting was fixed for September 30.

Ottawa.—Particular interest attaches to the announcement from London that the Imperial Conference will be held this autumn, in view of election possibilities. It has been rumored on a number of occasions that the Canadian Government would go to the country this fall, but announcement of the conference casts doubt upon such forecasts.

It is understood here that not only will there be an Imperial Conference, but that an Imperial Economic Conference will take place at the same time. The presence of the Prime Minister will be essential in London.

Consequently, if an election is to take place this year, it must be before the opening date of the conference, or after the conference is over. The latter would mean a pretty late election date.

There is no indication at present of what particular subjects Canada will desire to take up at the conference. These will be the subject of much consideration and discussion between now and October. With parliament in session, the Prime Minister will have an opportunity to hear what members from different parts of the Dominion have to say on matters of Empire interest before he departs for London.

Britain's New Auto-Laws

One Provision Is To Increase Penalties For Dangerous Driving

London, England.—Miss 1930, with her modern learnings, will find no difficulty in complying with the order compelling motor cycle pillion passengers to ride astride, which is one of the provisions of the road of the transport bill, on which second reading was moved in the House of Commons by Herbert Morrison, the Minister of Transport.

Other provisions of the bill abolish the speed limit for light motor cars, increase the penalties for dangerous driving, fix 16 years as the minimum age of ordinary automobile drivers and at 21 as the age of those driving public service vehicles; lay down a maximum number of working hours for drivers of heavy vehicles and enforce compulsory third-party insurance.

Will Cost Half Million

Manitoba To Extend Highway To Ontario Border

Winnipeg.—Manitoba's road link, which will meet the trans-Canada highway expansion at the Ontario border, will cost the province \$528,197, Hon. W. R. Clubb, Minister of Public Works, told the legislature. The road, construction of which will start in the spring, starts from the Whitemouth River, near the village of Whitemouth, and will follow the general direction of the Canadian Pacific Railway tracks to the Ontario border.

Mistakes Poison For Water

Young Chemist Dies Few Minutes After Drinking Fluid

Vancouver.—Hugh Chester Bell, youthful chemist, mistook a glass of poison for water in his office here, drank it down and died a few minutes later. An emetic administered by one of Bell's co-workers whom the stricken man called to his aid, failed to take effect and he died before a doctor could reach him. The deceased, an Oxford University graduate, had arrived in Vancouver only 18 months ago from England. He is survived by his wife and one child.

Mail Plane Destroyed

Saint John, N.B.—A Canadian Airways mail plane en route here from Moncton on the way to Montreal, was forced down on the Kennebecasis River ice, took fire and was destroyed. The mail was saved. The pilot and mechanic escaped injury.

Western Canada's Seaport Will Be Scene Of Great Activity During The Coming Summer

When Churchill, on Hudson Bay, Canada's newest seaport is opened sometime in the summer of this year, it will be the scene of an interesting social experiment. The land within the limits of the townsite will not be sold but will be leased by the Manitoba Government, under whose administration the townsite comes.

Since Churchill was chosen in 1917, as the seaboard terminal of the Hudson Bay Railway, it has been a great camp, with hundreds of workers engaged in harbour and railway construction in the summer and a small staff in charge of the plant in winter. But, as the chief depot of the new trans-Atlantic route by way of Hudson Bay, it is expected to be at once a centre of important interests, such as transportation, mining, grain handling and fishery. The harbour improvements that have been planned cannot be finished earlier than 1932, and the presence of the army of workmen engaged in this development will give the new town a favourable start. Rail connection is now completed over the whole stretch of 511 miles from The Pas to Churchill. Regular trains run over a part of the line, but winter connection is not maintained at present to the Bay. The entire line will, it is expected, be in regular operation in the spring of 1931.

Though the future of Churchill is regarded very favourably by many, the inflation which has attended such sentiment in the case of other prospective railway centres has been wholly prevented by the refusal of the Manitoba Government so far to give rights in lands of the townsite. The provincial government of Manitoba, availing itself of facilities afforded by Dominion authority, has prepared plans for the development of several towns of the north, including Churchill. It is expected that Churchill will be open to newcomers early next summer. The effects of planning and of the new system of landholding will then be seen.

The Hudson Bay Railway has been built by the Canadian Government and will be operated by the Canadian National Railways.

Cheapest Form Of Selling

Newspaper Ads Pay Best and Bring Quick Returns

"I know of no other method at once so quickly productive of results as advertisements in the Press," said Sir Charles Higham, at the Institute of the Motor Trade dinner, in London.

The cheapest and most effective way by which the local dealer, or anyone else, could advertise, was in the Press. They all knew, he said, that unemployment could only be solved by selling more goods.

"The public," Sir Charles added, "know that newspapers do not accept advertising for unreliable goods or services, and that they can buy the goods advertised with the confidence that they are worth what is asked for them, and that they are guaranteed. Such is the power of Press advertising today, that it has become the cheapest form of selling."

Alberta Savings Certificates

The sale of Alberta Government savings certificates in 1929 reached a total of \$9,856,466, and represented, with the one exception of the year 1926, the largest annual amount so invested. Savings now outstanding amount to \$11,715,493, and purchases made since 1917 total \$64,575,978.

"Daisy, I have swallowed the apple I was saving for mother."
"Heavens! Does it hurt?"
"Oh, no. I chewed it first."—Lustige Blätter, Berlin.

Have Taken To Air

People Of North Country Substituting 'Planes For Dog Teams

Practically all other means of travel in Mackenzie River district have now been superseded by the airplane, according to H. C. Ingram, inspector of civil aviation, who has just returned from an inspection trip over the airlines running to Aklavik, Yukon territory.

Mr. Ingram declared he was unable to travel the full route owing to the fact that he was delayed by fog. He went as far as Fort Resolution, 750 miles north of McMurray, returning with "Punch" Dickens of the Western Canada Airways. He reported the people of that part of the country to be fully air-minded. He observed only two dog teams along the northern route.

(By Annabelle Worthington)

Chic dressmaker details are smartly evident in this sapphire blue crepe silk with bolero suggestion at the right side of the front.

The flat hips with soft swathed treatment at front, emphasizes the higher waistline, so important in the mode. The irregular closing of collarless neckline is unusually becoming.

The circular tiers provide charming fluttering fullness that sways gracefully when wearer moves. It proves that good taste is not expensive, for here is a Paris model that you can copy exactly at the cost of the fabric, and have the added advantage of choosing a flattering colour.

Design No. 3015 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It is exquisite in crepe Elizabeth in dahlia purple shade for afternoons and Sunday evenings.

Black crepe silk is dignified for all-day occasions.

Tomato red crepe is decidedly youthful.

Pattern Price 25 cents. Be sure to fill in size of pattern.

SEED CLEANING CARS

A special train—a University on Wheels—has been equipped by the Canadian Pacific Railway to enable the farmers of Saskatchewan to avail themselves of the opportunity of receiving the latest information on seed cleaning and seedling machinery used in connection therewith. This lecture train will be in charge of officials of the Field Crops Branch, of the Saskatchewan Department of Agriculture and will travel over Canadian Pacific lines.

Manitoba Buttermakers

Carried Off Dominion Butter Championship At Ontario Convention

Manitoba buttermakers, at the recent convention of the Western Ontario Dairymen's Association, in London, Ontario, carried off the Association's trophy, emblematic of the Dominion's butter championship, according to Frank Horne, secretary of the Association. It is the first time in the Association's seven years of operation that the trophy has been taken out of Ontario—in this instance to go to the Manitoba Co-Operative Dairy, of Brandon. Yeast and mould scores were taken into account and a chemical analysis made at Ottawa. This caused a delay in announcing the winner.

Well Served With Railways

Sumas, Wash., a town of less than 200 inhabitants, on the Canadian border south of Vancouver, B.C., lays claim to being the smallest town on four transcontinental railways. Not only that, but Sumas is the terminus for three of these railways which include the Chicago, Milwaukee, St. Paul & Pacific, the Northern Pacific, the Great Northern and the Canadian Pacific. In addition, the town is a terminus for the British Columbia Electric.

While it costs \$40 a week to feed a sea lion at the London Zoo, a jungle lion receives 16 cents worth of cats' meat a day.

Complete \$50,000,000 Viaduct

Plans made a quarter of a century ago bore fruit in Toronto recently, when Canadian Pacific Railway train No. 3100 pulled a long line of passenger cars over the embankment and brought them in to track three platform on the high level line of the Union Station. His Honor Mayor Bert S. Wemp was on board the giant C.P.R. engine and received his first instruction in driving from Engineer T. Lloyd. U. E. Gillen, general manager of the Toronto Terminals Railway Company, told His Honor that all trains would be operated on the six high level tracks by April 15, and that work on six other tracks would be commenced at once and would be completed by the end of 1930.

National Museum At Ottawa a Treasure House of Wealth and Monument of Canadian Progress

Dr. Charles Camsell, L.L.D., F.R.G.S., Deputy Minister, Department of Mines, Ottawa, addressing the Professional Civil Servants of Canada and their friends in Ottawa recently, said in part:

I would like you, for a few minutes, to share with me a vision that has gripped the minds of some of us during the last few years. Looking ahead forty or fifty years, we see Canada, the home of a strong and prosperous people with twice or thrice the population it possesses today. Montreal, Toronto, Winnipeg and Vancouver, are great centres of world commerce, known to every school child in Europe as well as in America. Ottawa remains the political heart of Canada, a city unequalled on this continent for the beauty of its surroundings and the dignity of its public buildings. It is the pride of Canada, and the admiration of all America, a capital city worthy of the prosperous and progressive nation that holds a leading place among the nations of the world.

Here within this city of Ottawa, the capital of Canada, we see, amid other structures, a large and splendid building containing inside its walls a picture in miniature of the country's wealth and natural resources. We see a National Museum of Canada, a museum that houses samples of every rock and mineral, every animal, bird and fish, every seed and plant, and every variety of timber, that can be found on Canadian soil, or in Canadian waters, from Nova Scotia to British Columbia, and from the International Boundary to the Arctic Islands; a sample of every object that has its home within our territory and contributes to its prosperity and beauty. This National Museum is a treasure-house of our national wealth, a monument of our national achievements, and an educational and research institution that proclaims our natural resources and investigates some of our national problems. Everything that early explorers set their eyes upon is represented there—Indians clad in furs and armed with war-clubs or with bows and arrows; the buffalo, the beaver and the various bears; rare flowers from the Rocky Mountains, fine timbers from the British Columbia coast, and nuggets of gold and silver from the different provinces and mines. Here, too, is every natural object that concerns the farmer; types of soil and their special qualities, different varieties of wheat and methods of combating their diseases, all the fruits and vegetables and the ways of controlling their insect pests. The prospector, the miner and the geologist find in this museum every rock and ore that exists in the Dominion, with illustrations of their uses and samples of all the products we derive from them. The fisherman sees specimens of every fish, the methods of capturing them and of preparing them for the

market. The lumberman sees his timber in every stage of growth, and learns how to fight the beetles that ravage his standing trees. It is a great museum illustrating the natural history of the whole of Canada, a museum that ranks beside the similar museums in New York and Washington, in London, Paris, Berlin and the capital cities of all the greatest countries in Europe and America.

Yet it is not a dead museum, full of dry bones, stuffed animals and rocks covered with the dust flung up by passing motor-cars. Everything within its walls is both attractive and instructive. The children who crowd its doors from mere curiosity learn something unconsciously, the tired business man goes away refreshed and informed, the critical foreigner receives new impressions of the greatness of Canada and its natural wealth. There is a special staff to answer enquiries, to deliver addresses on Canada's resources, and to send out information to every part of the country. Manufacturers visit or write to the museum for ideas that they can use in their business; industrialists to find out our resources in coal. Cities and towns obtain help in building up local museums in all the provinces; and schools from Halifax and Quebec to Vancouver borrow motion pictures that teach our children the geography of Canada, its plants and animals, its mines and its water-powers. Then there is a research staff that studies the history and the problems of the country, that co-operates with other government departments and with universities and museums throughout the world, and that increases the fame of Canada as a home of science and learning.

This is our vision, and already the Dominion Government has taken the first steps towards its realization. It has established in Ottawa, the foundations of a National Museum, given it a building large enough for the next few years, equipped it with a small but active staff, and allotted a small sum of money each year for its maintenance. The advancement of this institution, the expansion of it into a great museum portraying the resources of the entire country and the achievements of its people, this it lays squarely on the shoulders of the people of Canada themselves. It looks for the support and assistance of every citizen, from the leaders in the financial and commercial world to the laborer on the farm and the workman in the mill. For a National Museum belongs to the entire country, and, like the great museums in London, and Paris, registers the progress and civilization of that country in the eyes of other nations. So I would ask you to share our vision, and to join with us in striving to make it a reality, in building up in Ottawa, the Capital of the Dominion, a National Museum worthy of Canada's rank among the nations.

Federal Farm Loan Board

Since the inception of the Federal Farm Loan Board, 1,464 loans have been approved, totalling \$3,026,050, or an average of \$2,067. Of the provinces participating, British Columbia farmers borrowed \$697,900; Alberta, \$1,543,100; Manitoba, \$48,800; Quebec, \$218,100; New Brunswick, \$396,550; Nova Scotia, \$121,600.

"Won't you walk as far as the street car with me, Tommy?"

"I can't."

"Why not?"

"'Cause we're going to have supper as soon as you go."

CHAPTER III.—Continued.

"I thought the room over the kitchen would be easier to heat in winter."

"The idea!" snapped Grandma. "That's where I used to put my hired girl!"

"And it's the most comfortable bedroom in the house," retorted Charmian. "I'd have taken it myself long ago, if I hadn't wanted to be nearer to you. But let's not worry over that question. He can decide it himself when the doctor brings him in on Saturday. Perhaps after his inspection he'll have none of us."

"Well, well," Grandma repeated, "it'll be a great change. I don't know as I like the idea—hardly. He may be fussy, and want milk in his tea instead of cream, like Deacon Purdie."

"Let's hope he does," laughed Charmian as she moved away. "It'll be that much cheaper feeding him!"

"Hush!" reproved the old lady. "Would you begrudge the poor man a dash of cream?"

It was a sunshiny Saturday when the doctor's dusty car stopped before the old Davis house. Grandma, peering from the window as usual, drew a breath of relief as she viewed the stranger who stood beside Doctor Howe, and was, evidently, admiring the carved pineapple above the door.

Yes, he was young, she decided, but not too young. He was past the age when he would thoughtlessly track dirt into the house (if a man ever is past that age!), and he wasn't old enough to be set in his ways—not thirty surely. He probably wouldn't notice whether his tea contained milk or cream; and he had fine, straight legs. Grandma had once been wooed by a youth who was slightly knock-kneed, and, as she told Charmian, after sixty years the remembrance still made her shiver.

"The Davises were all tall and straight," she continued. "That's one reason I took to your grandpa. There wasn't a knock-knee or a bow-leg in the family. They walked like soldiers."

"And he does, too," mused the old lady, as she watched the newcomer move toward the house. Then the doc-

tor looked up and waved to her, and in another moment was in the doorway.

"Well, Grandma," he began cheerfully, "this is John Carter. You see I kept my word and brought him in for you and Charmian to inspect. This is Grandma Davis, Doctor—Grandma to the whole town, and keeper of the village watchtower. We couldn't get along without her."

Grandma looked up and smiled, her eyes, bright as a bird's, meeting those of the young man as he took her hand and bent above it in a deferential manner of a bygone day.

She was thinking: "Somebody taught him his manners, anyway, and respect for age." She said, motioning her guests to be seated, "I supposed it was the other way round, and you were to inspect us. That's how Charmian put it. She's been cleaning the house from top to bottom, as if she thought you'd inspect the ice box and the attic," she added with a twinkle. "Charmian's my granddaughter, as the doctor's most likely told you. She'll be here in a minute. She just ran over to Lizzie Baker's with a half a cup o' cornmeal Lizzie forgot to order, as usual, and wanted to make an Indian pudding for her supper. Seems as if Indian pudding would set sort of heavy on the stomach come night, doesn't it?—but the Bakers can digest nails or horseshoes, as my father used to say; and which you'll find is true, young man, if ever you're called there—not that you will be, though, while our doctor has a leg to stand on."

"Hush!" laughed the old man. "Would you discourage him at the very start?"

"I'm only warning him," said Grandma. "Wickfield folks are set in their ways, and you're one of 'em, Edward, if I do say it to your face. Maybe you'll think it's disrespectful, my calling the doctor by his first name," she added to the younger man, "but we grew up together here in Wickfield, and I'm not much older than he is though he's caught the habit of saying Grandma like the rest of them. Here's Charmian now. She's seen the automobile and is hurrying. That blue gingham sets pretty on her, doesn't it? She made it herself. Come in, dearie. Here's the doctor and his young man."

Yes, the blue gingham certainly "set pretty on her." This was the prospective boarder's thought as he arose, feasting his eyes on the vision in the doorway. The old doctor was feasting his, as well; and Grandma Davis might have been said to do the same. For Charmian made an astonishingly pretty picture, her cheeks flushed from hurrying, her blue eyes shining, a bit of not unnatural embarrassment making her pause a moment before coming forward.

"Charmian," said the doctor, putting a fatherly arm across her shoulders to draw her nearer, "this is the boy who's promised to help me out if you'll find him a place to live. I knew his father and his grandfather before him, and will vouch for the fact that he won't run off with the Davis candlesticks!"

Charmian laughed as she stretched out a friendly hand which the young doctor took, and forgot to return till the girl drew it away. She said, a smile bringing out the dimples of which her mother had been so proud: "He might not think them worth the bother! They're brass, not silver, Doctor Carter. Would you like to go up now and see the rooms? The east room is larger; but the one in the ell looks toward the river and is very cozy."

"I really needn't look at anything," replied the young man impulsively. "I'll sleep in the attic, if only you'll take me in."

"Well," chuckled Grandma, "the attic's clean, anyway! I told you she'd cleaned everything. You take him up attic, dearie, and show him how pretty it is from the south window. There isn't a nicer view in all Wickfield. But I don't think, young man, that the room over the kitchen is good enough for a—guest. However, you can take your choice; and as Charmian says, it's easy to heat come winter."

As the young people left the room, the old doctor drew his chair closer to Grandma's.

"Well?" he questioned. "How does the boy strike you, Polly?"

"Dear me," sighed Grandma, a pleased light brightening her eyes, "I don't b'lieve anybody's called me Polly in twenty years. As for that boy, Edward, I like him. He's got manners—not that manners are

everything, but they cover a multitude of sins. And he looks you straight in the eye. If his eyes had been shifty I'd never have consented to take him in. But almost the best thing about him is his legs. He walks like a soldier."

"Yes," laughed the doctor, "his legs seem to be all right; though I wish he were ten pounds heavier."

"We'll have to fat him up," commented Grandma. "His being here will make more work for Charmian, but she says she can stand it. Say, Edward" (lowering her voice), "have you seen that high-flyer that Jim Bennett took to the church sociable?"

The doctor laughed again; but his reply was interrupted by the opening door, and a small boy entered hurriedly.

"It's Jamie Oldham," said Grandma. "You tell your mother that her yarn hasn't come yet; or were you wanting something else?"

"I want the doctor," panted the little boy. "The baby's got an awful stomach ache and Mummy saw the automobile and sent me running. She said to tell you the baby's black in the face already, and for you to hurry."

"Like as not Susy Oldham's been feeding it mince pie," commented Grandma, as the doctor hurried away. "It's a wonder she's raised any of her children. I suppose Edward will come back for that young man soon as he's turned the baby upside down and given Susy a good talking to. I wonder which room the boy will take. It doesn't seem polite, somehow, to put him in the ell."

The "boy" was standing in the ell at that very moment, exclaiming at the beauty of a big four-posted bed.

"Yes, it's wonderful," said Charmian, touching the carved posts lovingly. "My great-grandfather slept on it. Later it was put in the guest room, and when black walnut came into fashion it was banished to the servants' quarters."

"Delightful quarters for the humble," smiled the young man. "I think I'll choose this room if it's as convenient for you."

"It will be more convenient. It's smaller to care for, and easier to sweep because of the hardwood floor. That Turkish carpet in the east room is gorgeous, but it's a sight of work to clean!"

"Look here!" said the doctor suddenly. "I won't have you cleaning for me. I'll have time enough at first, anyway, to take care of my own domain. I'm a dandy sweeper, and can make a bed as expertly as a trained nurse. Just try me!"

Charmian laughed.

"What would Grandma say? She thinks it's frightful to even offer you this room where she used to keep her hired girl. But I think it's a lovely room with its quaint dormers. Just see the view from this window. Isn't the river adorable from here? When I was a little girl I used to pretend it was a silver ribbon, put there by the fairies. I remember confiding my fancy to Jimmy Bennett, and he laughed. I didn't forgive him for years and years!"

"No wonder!" responded John Carter with instant understanding. "Who is he? I'd like to smash his face for you!"

"You needn't bother," laughed Charmian. "In fact, I wouldn't have hurt him for worlds. Jim is the rising young man of our community, as you will soon learn; and at present is setting the town agog by running after a green hat."

(To Be Continued.)

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Back in 1700, the foundations of industrial medicine were laid when a doctor wrote a book of 43 chapters on "Diseases of Artificers and Tradesmen."

Minard's Will Kill Corns.

Russia Erecting New Mausoleum For Lenin

Elaborate Ceremonies Will Mark Dedication In October

Behind a great wooden fence, in front of Moscow's famous Kremlin, entirely screened from public view, hundreds of Soviet workmen are battering down the grim wooden tomb in which Vladimir Illich Lenin, "Father of Bolshevism," has slept during the last six years.

On this site is soon to rise a finer and more enduring mausoleum of granite and malachite to house the frail figure of the great revolutionary leader. While these operations are in progress, the embalmed remains of Lenin have been transferred to a special mortuary chamber in the Kremlin, where the coffin is guarded day and night by armed red soldiers.

On the ceiling, under which Lenin will repose in a large, hermetically sealed glass case, will be an armorial ensign of the Soviet Union. Lenin will be garbed in a simple khaki suit of semi-military cut, as at present, and the full length of his body, bearing the order of the "Red Banner" will be exposed to view.

Construction of the new mausoleum is progressing rapidly. It will be completed by October, 1930, when the thirteenth anniversary of the October, 1917, revolution will be celebrated. The most elaborate ceremonies will mark the dedication.

STORMY WEATHER
HARD ON BABY

The stormy, blustery weather which Canadians experience during February and March is extremely hard on babies and young children. Conditions make it necessary for the mother to keep them confined to the house, whose rooms may be overheated or badly ventilated. The little ones catch cold and their whole system becomes racked. To guard against this a box of Baby's Own Tablets should be kept in the home and an occasional dose given the baby to keep him fit, or if a cold suddenly grips him to restore him to health again and keep him in good condition till the brighter, warmer days come along again.

Baby's Own Tablets are just what the mother needs for her little ones. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach; break up colds and simple fevers; banish constipation and indigestion and make the cutting of teeth easy. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Just as we were converted by the open-window campaign our next-door neighbor bought a radio.

WRIGLEY'S

WRIGLEY'S is good company on any trip.

It's delicious flavor adds zest and enjoyment. The sugar supplies pep and energy when the day seems long.

In short it's good and good for you.

So SKINNY Ashamed in Bathing Suit Gained 15 lbs

—Eulah Lanningham writes: Thousands gain 5 to 15 lbs. in 3 weeks with new Ironized Yeast. Skin clears like magic. Nerves, constipation vanish overnight. Get Ironized Yeast tablets from druggist today.

Little Helps For This Week

"Let your speech be always with grace, seasoned with salt, that ye may know how ye ought to answer every man."—Colossians iv. 6.

Govern the lips As they were palace doors, the king within; Tranquil and fair and courteous be all words Which from that presence win. —Edward Arnold.

Wear your velvet within; show yourselves amiable to those, above all, who live with you.—Joseph Joubert.

He who governs his tongue is perfectly able to control all his passions. —William Ellery Channing.

Will Cut Illiteracy

An active program will be inaugurated within the next two weeks to reduce the number of people in the United States who cannot read or write before the census takers come in the spring. The object is to show illiteracy so reduced that the nation will not feel humiliation when its figures are compared with those of England, Germany, Switzerland, Norway, Denmark, Japan and other countries that now lead it in this respect.

Needless Suffering

The next time a headache makes you stay at home—

Or some other ache or pain prevents your keeping an engagement—

Remember Aspirin! For there is scarcely any sort of pain it cannot relieve, and relieve promptly.

These tablets give real relief, or millions would not continue to take them. They are quite harmless, or the medical profession would not constantly prescribe them.

Don't be a martyr to unnecessary pain. To colds that might so easily be checked; neuritis, neuralgia; to those pains peculiar to women; or any suffering for which Aspirin is such an effective antidote.

You need not hesitate to take Aspirin. It is safe. It is always the same. It never depresses the heart, so use it as often as needed; but the cause of any pain can be treated only by a doctor.

DON'T MISS IT

Snicklefritz ----

If the race to the railroad crossing ends in a tie, you lose.

Before marriage a man yearns for a woman. After marriage he has to earn for her.

Among the strange things in this world are bald barbers, skinny cooks and lazy married men.

After all, the tea kettle is a cheerful thing. It can be up to the neck in hot water and still sing.

Perhaps the easiest way to acquire a domineering personality is to be born feminine.

Gillett—Did you ever kiss a girl when she wasn't looking?

Terry—Not when she wasn't good looking!

Young Mathematician — "Mum, do you know how to get the cubic contents of a barrel?"

His mother—"No, ask your father."

Green—Can your wife perform on any instrument?

Gableigh (wearily)—Yes, she plays a lot on the ear-drum.

"Did yer git anything?" whispered the burglar on the ground as his pal emerged from the window.

"Naw; the bloke wot lives here is a lawyer," replied the other in disgust.

"Hard luck," said the first. "Did you lose anything?"

Music Teacher—Who can tell me the national air of Italy?

Bright Boy—Garlic.

She wears no socks in winter.
That needn't cause alarm.
For she has a pair of knock knees,
And the friction keeps her warm.

What has become of the girl who called her sweetie "Maple Syrup" because he was a refined sap?

A clergyman visiting a hospital, came to a Scotsman, who asked him to read a psalm. "Which one would you like?" asked the clergyman. "The longest in the book," was the reply. So the clergyman read the longest psalm. "That's guid," said the Scotsman. "Wull ye read it again, sir, and wull ye come a wee bit closer?" "Certainly," said the clergyman, and he read the psalm a second time. "Thank ye kindly sir," said the patient. "Ye ken ah've no had a drap for a fortnight and the verra smell's a Godsend."

THE WEDDING AS IT SHOULD HAVE BEEN REPORTED

Mr. Xenophon Hossenphlug became the bridegroom of Miss Lena Wayback at one of the biggest social gatherings in Middleton history. The groom was charmingly clad in a three-piece suit consisting of coat, pants and vest. The coat of some dark material was tastefully gathered under the arms and draped over the shoulders. It was whispered that it was the same coat

that had been worn by his father and by his grandfather on their wedding days.

The vest was sleeveless and met in front. It was gracefully fashioned with pockets in front and held up by a strap and buckle in the back. The groom's pants were of dark worsted and were suspended from the waist, falling in a straight line almost to the floor. The severe simplicity of the garment was relieved by the right pantelette which was caught up about four inches by a

Boston Brighton worn underneath, revealing brown Holeproof above boots of plaid, laced with strings of the same color. The effect was quite chic.

His neck was encircled by a Van Heusen, characterised by a delicate saw-edge, and around the collar a cravat was loosely knotted so that it rose up towards his left ear. Mr. Hossenphlug wore no hat at the ceremony.

Miss Wayback wore the conventional bride's costume and carried a bouquet of lilies-of-the-valley.
